DETAILED ACTION

Response to Arguments

Applicant's arguments, see pages 7-12, filed 20 December 2010, with respect to the rejections over the prior art and the newly added claims have been fully considered and are persuasive. The prior art rejections set forth in the non-final rejection of 20 September 2010 have been withdrawn.

Allowable Subject Matter

Claims 1-10 and 16-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 recites a data editing system comprising decoding means, database means, and editing means. The database means stores unique information into an electronic database in correspondence with predetermined processing parameter information, the processing parameter information indicating one or more editing processes performed on said decoded material data supplemented with said unique information. Further, the editing means performs predetermined processing in accordance with said processing parameter information.

The closest prior art discovered is the previously cited combination of Miyashita (US-2006/0001912) and Iwagaki (US-2003/0161468), which fails to teach the above features. Examiner has not discovered the data editing system of claim 1 in the prior art. Therefore, claim

Art Unit: 2625

1 is allowable over the prior art. Claims 2-5 each depend from claim 1, and are therefore also allowable over the prior art.

Claim 6 recites a data editing method which performs similar functions as performed by the system of claim 1. In claim 6, the unique information is stored into an electronic database in correspondence with predetermined processing parameter information, the processing parameter information indicating editing processing performed on said decoded material data supplemented with said unique information. The closest prior art discovered is the previously cited combination of Miyashita (US-2006/0001912) and Iwagaki (US-2003/0161468), which fails to teach the above feature. Examiner has not discovered the data editing method of claim 6 in the prior art. Therefore, claim 6 is allowable over the prior art. Claims 7-10 each depend from claim 2, and are therefore also allowable over the prior art.

Claim 16 recites a data editing system comprising a decoding unit, an editing unit, an electronic database unit, and an encoding unit. The system performs similar, but more narrowly defined, functions as performed by the system recited in claim 1. Thus, claim 16 is also allowable over the prior art. Claims 17-20 each depend from claim 16, and are therefore also allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
